要約 JP 2004063017 (A)

PROBLEM TO BE SOLVED: To provide a disk changer device in which influence by vibration can be made less than conventional one. ; SOLUTION: This disk changer device 100 has constitution provided with a casing, a turn table holding a disk, an optical pickup chassis supporting the turn table, a substrate 310 supported so as to be rotatable for the casing, a vibration proof member attached between the optical pickup chassis and the substrate 310, a lever 454 and a wire spring 454 rotating the substrate 310, a sliding plate fixing the optical pickup chassis and the substrate 310 and releasing prevention of vibration by the vibration proof member, a lever and arm 457, a single gear 452 transmitting driving power to the , the lever 454, a wire spring 455, the sliding plate, and the lever and arm 457. ; COPYRIGHT: (C)2004,JPO
